- ◎ Next js
- ◎ Tailwind CSS
- ◎ Typescript
- ◎ Shadcn/ui
- ◎ Node js
- ◎ Express js
- ◎ MongoDB
- ◎ Firebase
- ◎ Postgresql

ABOUT ME

Creative Frontend Developer specializing in building modern, high-performance interfaces with Next.js, Tailwind CSS, and shadcn/ui while maintaining strong UI/UX principles. Experienced in developing backend features with Node.js, Express, and MongoDB, with a passion for crafting visually engaging user experiences. Currently deepening expertise in Node.js architecture, PostgreSQL, and Golang to transition into a well-rounded full-stack engineer.

PROJECT SHOWCASE

GADGETCHEAP 🔗 Live link
Gadget & Accessories Ecommerce

A large-scale, modern e-commerce platform for gadget accessories designed to rival marketplaces like Amazon and Daraz, built with Next.js, Tailwind CSS, and shadcn/ui using the latest frontend technologies.
Features include dynamic product listings, automated product looping displays, OTP-based flows, and integrated ratings and reviews for enhanced user trust. I led the UI/UX design and frontend development, crafting a premium, highly responsive interface optimized for performance and user engagement—bringing advanced e-commerce experiences to a market where such platforms are still limited.

QUIXALOR 🔗 Live link
Multivendor Fashion Ecommerce

A full-stack multivendor fashion marketplace where individual stores can list products and customers can purchase them, similar to large-scale platforms like Daraz. Built with React Router DOM, Tailwind CSS, and shadcn/ui on the frontend, and Node.js, Express, MongoDB, and JWT on the backend.
Features real-time store–customer communication through a live chat system powered by Socket.io.
I handled the complete UI/UX, frontend, and backend development to deliver a scalable and interactive shopping experience.

MKS OUTFIT 🔗 Live link
Fashion Ecommerce

A fashion-focused e-commerce platform featuring a visually refined and user-centric UI/UX design. Built with Next.js and Tailwind CSS, with Firebase used for secure authentication and user management.
Developed as a company project with emphasis on performance, responsiveness, and modern interface patterns. I contributed primarily to frontend development, implementing polished layouts and engaging shopping flows.
